

## How to navigate an intersection...

### When a traffic light is not operational?

- Treat each traffic light as a four-way stop, with the driver on the right having the right-of-way.
- Proceed with caution only when traffic permits.
- Enter intersections only when it is safe to do so, using turn signals to let other motorists know your intentions.
- Use extreme caution in school zones.
- As always, yield to pedestrians in crosswalks.
- Watch out for and obey police officers directing traffic within intersections.
- Don't use the emergency number 9-1-1 to report a power outage.

### When the traffic lights are on flash?

- For flashing red, stop. (treat like a stop sign)
- For flashing yellow, proceed with caution.
