

TOWN OF JUPITER

Florida and palms go hand-in-hand. It's important to properly care for these signature plants in order to maintain a healthy ecosystem.

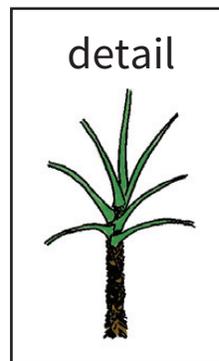

Did You Know?

Jupiter requires that all palms be pruned according to specific guidelines (detailed in Town Code, Chapter 23 - Landscaping). The over-pruning of palms is a common problem in our community, but proper pruning is simple and effective. Both property owners and landscape management companies have a responsibility to ensure that proper pruning occurs.

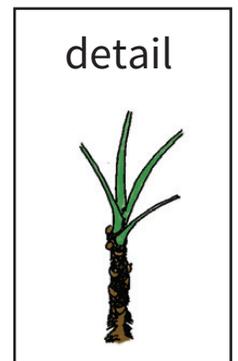

Before Pruning

Proper Pruning

Over Pruning

NEVER remove palm fronds that grow horizontally or point upward.

Be proactive —

If you hire an individual or a company to prune your palms, be sure to provide a copy of this proper pruning guide to them. Remember, you as a property owner are also responsible for the work performed and may be cited with a code violation if the work is improper.

The Town of Jupiter's staff is available as a resource for residents and businesses. Call 561-741-2323.
