National Research Center at Polco is a charter member of the AAPOR Transparency Initiative, providing clear disclosure of our sound and ethical survey research practices.

## Open Participation Methods

As part of its participation in The National Community Survey™ (The NCS™), the Town of Jupiter conducted a survey of 3,000 residents. Survey invitations were mailed to randomly selected households and data was collected from October 17, 2025 to December 15, 2025. The results from this main survey effort represent the most robust estimate of your residents' opinions.

After the above data collection period was underway, a link to an online open participation survey was publicized by the Town of Jupiter. The open participation survey was identical to the probability sample survey with two small updates: it asked if the respondent was a resident of Jupiter, and how they heard about the survey. The open participation survey was open to all town residents and became available on November 14, 2025. The survey remained open for four weeks and there were 79 responses.

The open participation survey data was not collected through a random sample and it is unknown who in the community was aware of the survey; therefore, a level of confidence in the representativeness of the sample cannot be estimated. Due to limited response, the results were not statistically weighted

## Open Participation Results

This table contains the full set of response frequencies from for each survey question, with “don’t know” responses excluded by default.

In some cases, percentages may not total 100%. This occurs either when respondents were allowed to select multiple answers or, for single-answer questions, as a result of rounding to the nearest whole number.

<b>Quality of Life</b>	<b>Please rate each of the following aspects of quality of life in Jupiter.</b>	Jupiter as a place to live	Excellent		<b>55%</b> N=41
